一、集合特点:
1、集合是无序的
2、集合天生去重
3、集合无下标
二、集合的操作
s=set() #定义空集合
s.add(1) #集合添加元素
print(s)
s.remove(1) #集合删除元素
print(s)
/Library/Frameworks/Python.framework/Versions/3.7/bin/python3.7 /Users/dongyf/Documents/python/besttest_study/test.py
<b>{1}</b>
set()
三、集合的交集,并集,差集,对称差集

python\_集合

```
x=[1,2,3,4]
y=[1,6,7,2]
z=set(x)
t=set(y)
print(z.intersection(t)) #取交集
print(z&t)
print(z.difference(t)) 脚差集 在a(方法前的)集合里面有,在b集合里面没有的
print(z-t)
print(z.union(t)) #取并集 把2个集合加在一起, 重复的去重
print(z|t)
print(z.symmetric_difference(t)) #对称差集 把2个集合加在一起,重复的去重
print(z^t)
/Library/Frameworks/Python.framework/Versions/3.7/bin/python3.7 / Users/dongyf/Documents/python/besttest\_study/test.python/study/test.python/besttest_study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/study/test.python/stud
{1, 2}
{1, 2}
{3, 4}
{3, 4}
{1, 2, 3, 4, 6, 7}
{1, 2, 3, 4, 6, 7}
{3, 4, 6, 7}
{3, 4, 6, 7}
```
